

B08 Technical Inspection Form Procedures – FSAE-B 2025

São Paulo, June 23, 2025.

Dear Teams,

For the **FSAE-B 2025** edition, the same procedure adopted in 2024 will be maintained regarding Technical Inspection Sheet, both for IC and EV vehicles.

You need:

After analyzing the images and the respective guidelines provided by the judges during the **Photographic Inspection**, the team must review the rechecks and implement the necessary improvements, as per the evaluators' guidance established in the FSAE Rules - GR.15.

As part of this process, the team will need to:

- **Update the your Technical Inspection Sheet** (download the latest updated version available from the SAE Brasil website – Messages and Information / Templates), including the specific checks on this Technical Inspection Sheet related to the Photographic Inspection analyses (to be completed by the team itself);
- **Print and bring the completed Technical Inspection Sheet** to the in-person inspection, with all the information relevant to the vehicle and the items highlighted below:

Mandatory items to be filled out:

- **Item 8: WET TIRES** – according to rule **V.4.3.2**
- **Item 10: DRY TIRES** – according to rule **V.4.3.1**
- **Item S21: TUBE MINIMUMS** – according to rule **F.3.2**

As a good practice for Engineering Documentation, bring copies of these **Technical Inspection Sheet** and all documents relevant to your vehicle, including **SES** in electronic format.

Everyone's collaboration is essential to ensure an agile and efficient technical inspection process. If you have any questions, contact the Technical Inspection Committee through the FSAEB Forum.

Best regards,
FSAE-B Technical Inspection Committee
